## CHAT ROOM DANGERS

Chat rooms are a page on the internet that lets you talk to people you know or don't know.

Parents don't always know how dangerous chat rooms can be. People can be lying about their ages, names and gender.

People can send fake messages about banking trying to get your bank details.

Chain mail can be a big problem for kids and parents. It is not true. It is just people who want to sell your E-mail address to other people.

When you use your computer, before you click on something, check what it is because it could be dangerous.
